

LEP ANNUAL DELIVERY PLAN 2022-23

Foreword

It is a privilege to take up the Chair of the West of England Local Enterprise Partnership and to welcome Katharine Finn and Sue Rigby as Joint Vice Chairs.

The West of England is a region where ideas flourish and where businesses grow. We have one of the highest productivity levels in the UK outside of London, host the UK's biggest aerospace cluster, have a world-renowned creative sector and four prestigious universities. It is also a place that a diverse population of people call home. With a collaborative business community and a highly skilled population our region's economy is built on strong foundations.

The West of England Local Enterprise Partnership (LEP) brings the voice of business and universities into the West of England Combined Authority. We have seen

significant challenges over the last two years due to Covid, but we have been able to bring our collective voice to ensure that these challenges have been recognised and where possible funding and support made available. This has included re-focusing existing support and identifying opportunities for further investment in areas critical to our recovery.

We are committed to creating a better, greener future for our region and to shaping a compelling and ambitious regional strategy that champions the economic success of the region locally, nationally, and internationally. Through the LEP we are funding projects and activities that benefit businesses, schools, colleges, universities and residents. These are reflected in the case studies included in this report. As we move into 2022 and beyond, we will continue to focus on activities that will support recovery and help to build a sustainable future. Priorities will include green infrastructure, sustainable transport and the creative and cultural sectors.

We publish this report as the Government publishes its Levelling Up White Paper. I was encouraged to see the recognition of the positive impact of LEPs, of their future value, and of the plans to bring these closer to Mayoral Combined Authorities. We look forward to working with colleagues to take these plans forward.

I cannot finish without recognising the incredible contribution of our Board Members. Their diverse range of skills and experience, and willingness to go the extra mile, ensures that the business voice continues to play a critical role in shaping the region's future. Together we remain passionate about the region and committed to ensuring the West of England is firmly on the map as a place of creativity and innovation.

Richard Bonner

**Chair of the West of England
Local Enterprise Partnership**

Local Growth Fund

Through three competitive Growth Deal funding rounds, the LEP secured a total of £202.1m from the government's Local Growth Fund that has been invested in the West of England from 2015-2021. This funding is matched by over £600m of additional investment from local partners, Government and the private sector, and together will create over 9,000 jobs.

The LEP secured a total of £13.7m capital funding from the Getting Building Fund to help deliver major projects which are planned to stimulate jobs and support the region's economic recovery. This funding is matched by £47m of additional investment from local partners, Government and the private sector, and will create or safeguard some 2,400 jobs, while also benefiting more than 265 businesses.

The project and programmes funded through the Local Growth Fund and Getting Building Fund are detailed on our website:

Local Growth Fund projects

Cattle Market Road Demolition

Construction Skills Centre, Bath College

Bath & North East Somerset Council

Improving People's Lives

Food Works, South West Food & Drink Innovation Centre

Future Space, University Enterprise Zone, University of the West of England

Bristol VR Lab:

A coworking space for development in the fields of Virtual, Augmented and Mixed Reality technology

Future Technology Centre, Weston College

Bath University - Institute of Advanced Automotive Propulsions Systems (IAAPS)

National Composites Centre

Bromley Heath Viaduct, South Gloucestershire

Bristol & Bath Science Park, providing the space and support for science and technology businesses to accelerate their growth

Careers Hub and Enterprise Adviser Network

The Careers Hub and Enterprise Adviser Network (managed by the Combined Authority and the LEP) receives funding support from the Careers and Enterprise Company, a national body funded by the Department for Education. The Careers Hub supports all secondary schools and colleges in the West of England region, giving them the skills, knowledge and information that they need to deliver effective careers programmes and enable local young people to fulfil their potential.

In the past year we have supported schools and colleges to:

- Adapt to delivering virtual employer engagement opportunities for students.
- Deliver targeted support for students who face barriers to achieving successful transitions.

- Enable more students to benefit from employer-led curriculum delivery by training more teachers on how to embed careers in the curriculum.
- Provide additional resources to support students to understand Labour Market Information specific to the LEP region.
- Train careers leaders in schools through funding.
- Enable additional careers activities to be delivered by providing small grants.

Next year we will be focusing on:

- Targeted support for disadvantaged students through the Effective Transitions Funding. This will support 100 young people from across the region to make successful post-16 transitions.
- Building capacity within virtual schools to better support looked after children through the Hub Incubation Funding.

- Aligning school provision to the green skills and Net Zero agenda.
- Influencing school and college leaders to better resource careers provision to ensure all young people are benefiting, with a focus on those who face additional barriers.
- Providing targeted support for employers and Special Educational Needs & Disability schools to work together to better support their learners' next steps.

The Careers Hub is part of an integrated portfolio of employment and skills services delivered by the Combined Authority and LEP which helps us maximise its value for the West of England. For example, through our £8m Workforce for the Future programme (see below) a dedicated resource has been created to link schools and colleges directly with employers.

Careers Hub and Enterprise Adviser Network	Forecast 2020/21	Actual 2020/21	Total from April 2018 to March 2021	Forecast 2021/22	Forecast 2022/23	Forecast 2023/24	Total planned by 2024/25
Grant Funding	£504k	£338k	£776k	£485k	£245k	£38k	£1,580k
CA Investment Fund	£175k	£136k	£225k	£158k	£72k	£0	£473k
Total Funding	£679k	£475K	£1,001k	£643k	£317k	£38k	£2,053k

*Funding for the Careers Hub works across academic years which means there are sometimes discrepancies in spend across financial years. All funds for the project will be fully committed within the parameters of our grant funding with the CEC.

CASE STUDY: Collaboration between Gordano school and Low Carbon Gordano

The Careers Hub has supported teachers to collaborate with local employers so that students have the opportunity to understand how their learning links to the world of work.

At Gordano school, as a result of the training and support from the Careers Hub, the science teacher was able to work with Low Carbon Gordano to deliver the Year 8 'Energy' project. The company provided information about energy output from the solar array and students were asked to complete an energy efficiency audit of their own homes. The students produced posters which received detailed feedback via an informal video from one of the directors, including tips about communicating information and selecting examples of particularly good practice.

“It has worked out better from our perspective than even we thought it would and has got to be one of the most productive and worthwhile collaborations with a company I’ve done (and I’ve done lots!)”

Representative from Gordano school

Invest Bristol & Bath

Invest Bristol & Bath (IBB) is the inward investment service for the West of England managed by the Combined Authority. With an in-depth knowledge of sectors, technologies, talent, and a network of key ambassadors and international contacts, the team know what makes the West of England the best place to invest. The team supports foreign direct investors and UK national companies to set up and expand into the region. Through a programme of strategic account management, we also support companies in the region as they grow and expand, with hands on advice and intelligence.

Through targeted lead generation and international market priorities, the team secure inward investment aligned with the West of England ambitions, enabling decent jobs and opportunities for residents. By promoting the region's amazing innovation and creativity to the world IBB help to put the West of England on the map for national and global success generating increased public, private and international investment into the region.

Invest Bristol & Bath	Forecast 2020/21	Actual 2020/21	Cumulative total to March 2021	Forecast 2021/22	Forecast 2022/23	Total planned by 2022/23

LEP funding	£1,000k	£860k	£5,660k	£1,140k	£1,000k	£7,800k

CASE STUDY: NMI

A leading global FinTech firm in the West of England, NMI is one of the world's leading card payment technology companies. NMI enables payments in different ways and places, all with the utmost security and reliability. Developed in Bristol, their work has been used across the globe in over 40 countries, from software that drives ATM machines through to technology used to buy a train or bus ticket.

NMI is an example of a business that can thrive in the West of England but also gives back to the region; offering work placements to local University students every year, providing consistent customer support during the pandemic to ensure businesses can adapt, and promoting sustainable transport and health & wellbeing support to their staff. <https://www.bristolandbath.co.uk/case-studies/nmi/>

“There are many benefits to NMI being located in Bristol – the vibrant and multicultural city, excellent transport links and an enviable location making attracting and retaining staff much easier. There’s also a rapidly growing FinTech sector in the region and some of the best universities on the doorstep giving access to a rich talent pool. We have a particularly strong relationship with the University of the West of England that not only prepares students for the needs of the job but also how to integrate into the working world”

Jeremy Gumbley, NMI CIO/CSO

Growth Hub

The Combined Authority's Growth Hub is instrumental in helping new and existing businesses thrive and to secure decent jobs and opportunities for residents. The Growth Hub is co-funded by the Department for Business, Energy and Industrial Strategy (BEIS) and the Combined Authority. It is a free service that combines national and local business support, offering programmes that respond directly to what businesses say are critical for recovery and growth.

In the last year the Growth Hub has significantly expanded its reach into the business community using additional resource to support needs related to Brexit, the Covid-19 pandemic and business recovery. Enterprise advisors are successfully helping businesses to identify growth potential and take up support. Our business support programmes, and vast network of partners offer tailored sector-specific support to accelerate innovation, improve sustainability, develop workforce skills, and drive growth.

Growth Hub	Forecast 2020/21	Actual 2020/21	Total from March 2016 to March 2021	Forecast 2021/22	Forecast 2022/23	Total planned by 2022/23
Businesses Supported	1,200	4,584	11,262	4,500	4,500	20,000
CLGU Grant Funding	£700k	£830k	£2,480k	£770k	£700k	£3,950k
CA Investment Fund	£1,600k	£540k	£540k	£1,280k	£945k	£2,765k
Total Funding	£2,300k	£1,370k	£3,020k	£2,050k	£1,645k	£6,715k

CASE STUDY: Noiser

Noiser, a Bristol-based Podcast company specialising in history and drama storytelling with immersive sound design, benefitted from support to respond to challenges they faced during the Covid-19 pandemic. Noiser received a £2,000 grant from the Creative Scale Up programme to develop a sales team and define a clear strategy to drive sales.

“For Noiser, we are not looking for generic business support; I liked how the scheme’s supervisors made us aware that we could find our own mentors and they were able to help connect us with pertinent professionals they were in touch with. This was crucially important. We found value in the grant available as it allowed us to put finance into the business where it was needed most. Having that ‘cushion’ has been instrumental in us growing our business.”

Pascal Hughes, Founder

Creative Scale Up

The Creative Scale Up programme was initially a two-year pilot programme funded by the Department for Digital, Culture, Media & Sport (DCMS). It aims to help creative businesses in the West of England access finance through an intensive sustainable growth support programme. Creative Scale Up also mobilises regional and national investors, encouraging them to invest in the West of England hotbed of creative businesses through a programme of events, targeted marketing and the development of the Invest In Creative Toolkit. In response to the pandemic the programme delivery moved online creating savings which were repurposed to extend the programme for a third year. This project is due to complete in March 2022.

Creative Scale Up	Forecast 2020/21	Actual 2020/21	Total from January 2020 to March 2021	Forecast 2021/22	Total planned by April 2022
Businesses Supported	55	57	57	20	77
DCMS Grant Funding	£650k	£650k	£1,300k	Not applicable	£1,300k

CASE STUDY: Auroch Digital

The Creative Scale Up programme offers regional creative businesses and freelancers a five-month support programme with access to grants, mentoring, workshops, one-to-one support and 360 peer feedback. Auroch Digital, a games design & development company were part of the first cohort of creative business to join the programme and have experienced rapid growth.

The support grant funded “Digital Table Top Fest” 2020/2021; an online event that offered Auroch the opportunity to recruit an event planner to co-ordinate a hybrid event of both physical and online experiences. It allowed the team to build longer-term networks which added value and gave extra support, through increased coverage via partner platforms and amplification of Auroch’s work.

<https://www.westofengland-ca.gov.uk/case-studies/auroch-digital/>

“The mentoring side of the programme we found really useful, it gave us an opportunity to talk about our overall strategy and gain confidence in what we’ve already put in place.”

Tomas Rawlings, Founder

Culture and Creative Economy Recovery Fund

The Combined Authority recognised the impact of the pandemic on self-employed people, with creative freelancers in particular having a higher percentage of the workforce affected by the pandemic compared to other industries. Building on the Creative Scale Up support, a £2m Cultural and Creative Economic Recovery Fund programme was established, providing direct grant support to freelancers, alongside a bespoke creative sector support programme, which includes mentoring, training and peer-to-peer. This project is due to complete in December 2022.

CASE STUDY: Acting Out

Acting Out is a theatre education company which has benefitted from the Combined Authority’s creative freelancer grants. Jacqui Ham, business owner and Drama teacher, was awarded £3,000 to expand the business, undertake professional development and take a different approach in light of the pandemic.

The grant has meant the workshops, classes and performances have been able to run in communities not previous reached and build relationships with new schools & teachers.
<https://www.westofengland-ca.gov.uk/case-studies/acting-out/>

“The Combined Authority has been very supportive, which will help me to grow my partnerships with schools and to develop my own practice with different age groups. The grant has been essential in helping me to grow my business.”

Jacqui Ham, Drama Teacher

Culture and Creative Economy Recovery Fund	Forecast 2021/22	Forecast 2022/23	Total planned by 2022/23
Businesses Supported	332	30	362
West of England Recovery Fund	£1,250k	£369k	£1,619k
DCMS Grant Funding	£2,000k	Not applicable	£2,000k
Total Funding	£3,250k	£369k	£3,619k

Workforce for the Future

Workforce for the Future will improve skills to benefit residents and businesses across the region. It is a £4.1m fund supported by a further bid for £4m from the European Social Fund for activities to link small and medium sized enterprises (SMEs) with the right talent, creating new employment opportunities for residents.

Take up of the programme has been impacted by the pandemic, with SMEs focusing primarily on the immediate impacts of cashflow,

however we are now seeing a steady increase in SMEs engaging with the programme as the economy has reopened. A total of 50 businesses had completed meaningful activity on the programme as of March 2021. This was primarily through the Creative Workforce for the Future Pilot Project which ran from October 2019 to March 2021. The number of businesses completing activity has now risen to 66 (as of September 2021) with a further 132 businesses onboarded to the programme and working with one or more of the delivery partners.

Delivery is expected to increase in 2022 as SMEs switch their focus from survival to recovery and growth. The longer-term impacts of the pandemic alongside those of the UK exiting the EU means that labour and skill shortages are now being experienced across many sectors. Workforce for the Future offers a range of bespoke support solutions helping SMEs develop their existing staff, as well as linking them to local talent emerging from the skills system.

Workforce for the Future	Forecast 2020/21	Actual 2020/21	Cumulative total to March 2021	Forecast 2021/22	Forecast 2022/23	Forecast 2023/24	Total planned by 2023/24
Businesses supported	120	21	50	239	95	95	479

CA Investment Fund	£974k	£373k	£515k	£1,100k	£1,500k	£954k	£4,100k
Total Funding	£1,967k	£746k	£1,030k	£2,200k	£3,000k	£1,770k	£8,100k

Low Carbon Challenge Fund

The Low Carbon Challenge Fund (LCCF) supports the shift towards a low carbon economy, by funding energy saving improvements and innovation; and it helps businesses recover from the financial impact of the pandemic by reducing utility bills. The project as a whole has £3.5m capital grant available, comprised of £2.1m from the European Regional Development Fund (ERDF) and £1.4m from the West of England Recovery Fund. An additional Recovery Fund allocation covers staff costs, which means that the ERDF funding is now entirely available as grant. The overall targets have therefore been updated since the last report.

LCCF is managed by the Combined Authority, reporting to: the Department for Levelling Up, Housing and Communities for the ERDF funding, and the West of England Combined Authority Committee for the Recovery Fund monies.

LCCF has three grant streams: Green Business Grants, the Innovative Local Energy Scheme and the Innovative Housing Retrofit Scheme.

- The take up of Green Business Grants was significantly affected by the pandemic and the financial uncertainty facing businesses in 2020, which is reflected in the figures. However, a second Green Business Grant window, held from January to July 2021, received over 120 applications. This positive

Low Carbon Challenge Fund	Forecast 2020/21	Actual 2020/21	Total from April 2019 to March 2021	Forecast 2021/22	Forecast 2022/23	Total planned by 2022/23

response indicates a returning confidence for many businesses. A third six-month grant round will begin from December 2021. To date, 70 SMEs have been awarded £616k grant to make energy saving improvements. This is 36% of the £1.7m pot. In addition, 168 SMEs have received a free Decarbonisation Report to help them understand their greenhouse gas emissions and practical ways to reduce them.

- The first round of the Innovative Local Energy Scheme grant was awarded at the end of March 2021 to a community-led wind turbine project, which is expected to be operational by late 2022. This project will increase renewable energy generation and help deliver the Lawrence Weston Community Plan through a long-term income stream. The total cost estimate has been reduced since the last report. A second £800k grant competition is currently underway and will be awarded in early 2022.
- The Innovative Housing Retrofit Scheme grant, a pilot project to test new technologies and approaches in hard-to-treat homes, will be awarded in early 2022.

CASE STUDY: Pentagon Sport (South) Ltd.

The West of England Green Business Grants Scheme offers capital grants to SMEs in the region to improve the energy efficiency of their buildings and/or business operations. The grant pays for 50%-80% of costs depending on the business size, location and project. Pentagon Sport Ltd is one of the businesses which has benefitted from this grant, being awarded £3,420 towards their relocation project.

Based in North Bristol, Pentagon manufacture and install playground and outdoor learning products and facilities for schools and nurseries. Pentagon used the grant money to replace the existing fluorescent lighting to fit eco-friendly LED lighting with sensors to help save energy. The improvements overall have meant a 73%

reduction in energy use as well as giving the business an annual saving on their bills of £2,665.

<https://www.westofengland-ca.gov.uk/case-studies/pentagon-sport//>

Business Innovation Fund

The Business Innovation Fund provides grant funding and wider support to SMEs that are progressing research and development (R&D) activity that will bring innovative new products, processes and/or services to market. The programme budget includes external funding (ERDF), private sector contributions, and match funding from the Combined Authority’s Investment Fund.

SMEs can access the fund via application rounds, of which two have been opened to date, with a third to be opened in late 21/22. Applications are competitively assessed following their submission. 21 businesses have been allocated funds (totalling £510k and leveraging a further £940k in private sector contributions) so far to support SMEs to carry out R&D projects, such as: i) testing/trialling how to optimise of a low carbon energy microgrid and ii) developing educational

technology (EdTech) that supports vulnerable children and young people. Further awards are to be made in early 2022.

The financial and output figures provided in this delivery plan are an update and reflect a realistic reprofile of when SME project delivery, and related spend, will occur.

South West Energy Hub

The Combined Authority is the host and accountable body for the South West Energy Hub which supports organisations across the wider South West of England to identify, develop and implement projects that reduce energy use and the transition to Net Zero.

In 20/21 the Energy Hub received £52.95m from BEIS to deliver the Green Homes Grant Local Authority Delivery Phase 2 project across the wider South West. This is in addition to the £4,197,938 received to date for delivery of its other programmes including: Local Capacity, Rural Community Energy Fund, Council Tax & Business Rates Pilot and Social Housing Technical Assistance Pilot.

In the West of England the Energy Hub procured City Energy to deliver £7.5m of energy efficiency retrofit work as part of the Green Homes Grant Local Authority Delivery Phase 2 programme. This will be delivered in 21/22.

The Energy Hub also worked with the West of England Local Authorities to identify opportunities for renewable energy generation across their estates and other key sites, and also to develop future housing retrofit projects.

Working at the regional level the Energy Hub helped to develop and launch the Energy Planning Integrated with Councils (EPIC) project. This £500k project is a collaboration between the Energy Hub, the Combined Authority, Western Power Distribution,

Wales & West Utilities and Regen to take an innovative data and modelling tools approach to understand the impact on distribution network of future strategic development and enabling the exchange of information with strategic master planning and local plans to understand how best to manage the network for future demand.

As part of the Rural Community Energy Fund the Energy Hub has funded Bath & West Community Energy to undertake feasibility studies into establishing a renewables-powered electric vehicle charging network.
